

In the Claims

Please amend Claim 13 as shown in the Version to Show Changes, to read as listed, below.

13. (Amended) A pump-attachable device that monitors a vacuum pressure in a vacuum extraction device, comprising:

an adaptor enabled to attach to a pressure gauge receiver of a hand pump, the hand pump adapted to couple to a vacuum extraction device having a suction device coupled thereto;

an air pressure detector secured in the adapter such that the pressure detector is exposed to an air cavity in the hand pump; and

a cable coupled to the air pressure detector, the cable enabled to attach to a monitor for recording a detected vacuum pressure.
